Seems at the rate my disability has kicked back in unless they can find some way to slow it down my doctor said to me in 5-10 years I will be completely disabled and on my way out. I got a doctor who doesn't BS me.

Just came back to share the good news with someone who would be happy about it.

I'll go back to the forums I'm welcomed at now.

Chris

Chris I am really sorry about your recent set back but you are assuming that nothing will come along in the next 5-10 years to slow down your MS or even help you to improve. Please remove the comment about Bob Chris. None of on here want to see anyone get worse no matter how much we have disagreed with them.

I'm sad to hear the news and I'm sad that you're so mentally twisted that you thought I'd find enjoyment in that.

I don't hate you, I'm just tired of you coming around every few months to dog me out.

You and I had super high hopes for Revimmune.....not doubting you or your neuro but what signs of progression are you seeing?
